

EARN WHAT YOUR ENERGY IS REALLY WORTH!

Maximise your customers savings with Amber Smartshift Battery Optimisation.

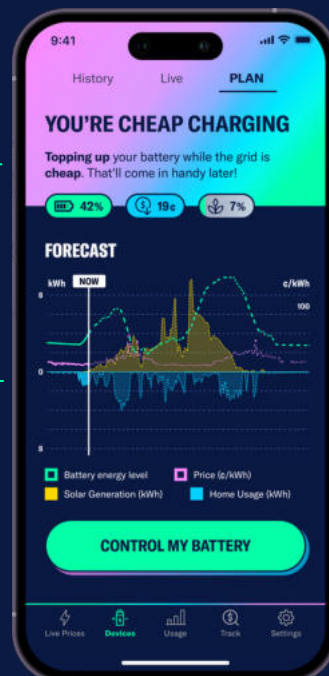

EARN FEED IN TARIFFS UP TO
\$19/kWh

We make \$0 on your energy usage and pass through 100% of your earnings - all for a \$22 monthly subscription fee.

Access **cheap renewables** to keep your battery topped up

Automate your battery to **buy low** and **sell high**

Choose to charge, discharge, preserve or consume their battery

Users can also set the portion of battery they'd like to make available to SmartShift

After joining Amber, it takes approximately 1 month to have your battery fully optimised. Look out for Amber's emails in this time in case we need you to action anything

[Learn more at amber.com.au](https://amber.com.au)

Set how 'active' the algorithm is, with two automation modes (Earnings Optimiser, Battery Booster)

Choose to disable SmartShift optimisations completely if desired

Control Your Battery

Choose to charge, discharge, preserve or consume your battery

Users can also set the portion of battery they'd like to make available to SmartShift

Schedule when to charge your EV
